INNOVATION A WAY OF LIFE

BLACK+DECKER has been at the forefront of innovation starting with the invention of the first pistol grip electric drill in 1916. It has since brought several world's first for its consumers to emerge as a global marketer and manufacturer of quality products used in and around home.

In 1979, BLACK+DECKER invented a completely new concept in household cleaning called as Dustbuster®, expanding its cordless revolution from the workbench to all parts of home and beyond. Since the launch of world's first handheld cordless vacuum cleaner and evolving through Pivot (2006) and Flexi Dustbuster® (2009) designs into the current day range, almost four decades later BLACK+DECKER continues to lead innovation in the handheld cleaning category.

In 2010, for the evolving hypoallergenic home sanitizing segment, BLACK+DECKER developed the Steam Mop™ Deep Clean Series encompassing an all-round home steam cleaning solution, catering both floor and above-the-floor applications. The global success and wide acceptance led to the development of a full range of environmentally friendly steam mops in 2012, using only water and heat. The most recent introduction in 2017 i.e. 3rd generation of steam mops is a more advanced range and includes an innovative SteaMitt™- giving the power of steam in the palm of user's hand.

With a heritage of more than 100 years as one of the most trusted brand in the world, in 2014, BLACK+DECKER revealed a new global brand identity for its consumer branded tools and home products. The new BLACK+DECKER identity builds on that trust of providing innovative and reliable products while providing consumers a meaningful, emotional and empowering experience for the home.

At BLACK+DECKER, we are focused to create practical, meaningful products and services that make life easier - empowering people to do better, safer, more significant work!

5 FACTORS TO BE CONSIDERED WHILE CHOOSING THE VACUUM CLEANER

If you're serious about cleaning your carpets and shining your floors, just any vacuum won't. Type, features and vacuum design are important, but the type of floors and the level of cleaning they require should be your focus when making a decision.

BAG OR TANK CAPACITY: The more quickly the bag fills, the more frequently it will have to be changed. Keep in mind that, as the bag fills, the efficiency of your vacuuming goes down. Change bags often for top efficiency.

AIR FLOW: This will be measured in cubic feet (or centimeters) per minute. The more air flow, the better. Air flow is what carries the soil up into the bag or container.

AIR FILTRATION: The cheapest systems have a cloth bag that has to be dumped, cleaned regularly and replaced since it becomes saturated with dust. Better units will have two to four stage filtration systems with throw away paper filter bags down to 0.3 micros or less to reduce dust.

ERGONOMICS: The weight of the machine, handle construction, wheels or rollers if an upright unit, length of cord and maneuverability are all factors that impact the decision for utilizing a unit.

KEEP AN EAR OUT FOR NOISE: When it comes to hearing protection, canister vacuums are the best choice because they tend to be quieter as compared to other types of vacuum cleaners.

HOME VACS

VH801

800W Handheld Vacuum Cleaner

- Power: 800 watts
- 5 Handy Accessories
- Equipped with strips
- Blower function
- Vacuum function
- Cloth dust bag capacity: 0.9 L
- Translucent dust bowl that can be removed and washed
- 5 meter cable

Accessories: Service Nozzle, Blow Nozzle, Extension Hose, Shoulder Strap

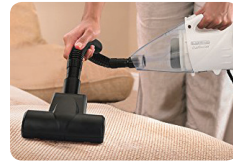

VH802

800W Vacuum Cleaner & Blower

- Power: 800 watts
- Transparent bowl capacity: 0.9 L
- Turbo brush for carpet cleaning
- Blower function with special attachments to blow out dirt & dust
- Soft extension hose to clean difficult to reach areas

Accessories: Vacuum cleaner unit, Turbo brush, Multipurpose brush, Crevice plus upholstery brush, 2 Extension tubes, Flexible hose and Shoulder strap

VH780

780W Multi - Use Vacuum & Blower

- Power: 780 watts
- Blue Color/Black Color
- 14 Handy Accessories
- Blower & Inflation function
- Built - in Clog indicator
- 3 stage filtrations
- Bowl capacity: 370ml
- 6 meter cable

Accessories: Vacuum cleaner unit, Crevice tool, Fabric brush, 3 blower attachments, Carpet glide, 3 suction attachments, 3-piece plastic tube, Hose assembly

MULTICYCLONIC BAGLESS VACUUM CLEANERS

ADVANTAGES

- Faster Cleaning for busier lives
- Improved filtration and dust separation for cleaner homes
- Less noise pollution

RUNTIME

plays an important role

- Use it continuously for over 30 mins without having to switch off
- Motor can withstand continuous usage

CLEAR BOWL

- To see the technology
- To monitor the dirt & debris that have been picked up

LIGHTWEIGHT AND EASY MANOEUVREBILITY is crucial

- To clean quickly between rooms
- It's critical for the aging population

VERSATILITY

is a valuable feature

Good for awkward areas & upholstery

COMPACT DESIGN

- Easy storage
- Flexibility in cleaning (easy to clean under furniture)

SUCTION POWER

Consistent and strong

- Vacs are used on varied surfaces
- The units need to be efficient and strong, as the users want to clean as quickly as possible
- Power to pick up heavier debris (peas, sweet corn, raisins)

VM1200

1000W Bagged Vacuum Cleaner

- Power: 1000 watts Max
- 100 Air Watts of Suction power
- Dust Box capacity: 1.0 L washable
- Dust bag full indicator
- Cord rewind function
- Easy carry handle
- Rubber Wheels

Accessories: Upholstery brush and service tool

CORDED VACCS

VM1480

1480W Multicyclonic Bagless Vacuum Cleaner

- Power: 1480 watts
- 6 stage filtrations with multi cyclone
- Variable speed step less suction for better control
- Dust Box capacity: 1.8 L
- Overload protector
- 5 meter long power cable
- Automatic cord winder
- Washable low maintenance filters

Accessories: 2 in 1 brush, round brush and upholstery brush

VM1680

1600W Multicyclonic Bagless Vacuum Cleaner

- Power: 1600 watts
- 6 stage filtrations with multi cyclone
- Variable speed step less suction for better control
- Dust Box capacity: 2.5 L
- Overload protector
- 5m long power cable
- Automatic cord winder
- Washable low maintenance filters

Accessories: 2 in 1 brush, round brush and upholstery brush

VM1880

1800W Multicyclonic Bagless Vacuum Cleaner

- Power: 1800 watts
- 6 stage filtrations with multi cyclone
- Variable speed step less suction for better control
- Dust Box capacity: 2.5 L
- Metal Telescopic Tube
- Overload protector
- 5m long power cable
- Automatic cord winder
- Washable low maintenance filters

Accessories: 2 in 1 brush, round brush and upholstery brush

VM2080

2000W Multicyclonic Bagless Vacuum Cleaner

- Power: 2000 watts
- 6 stage filtrations with multi cyclone
- Variable speed step less suction for better control
- Dust Box capacity: 2.5 L
- Metal Telescopic Tube
- Overload protector
- 5m long power cable
- Automatic cord winder
- Washable low maintenance filters

Accessories: 2 in 1 brush, round brush and upholstery brush

VM2825

2000W Bagless Cyclonic Vacuum Cleaner

- Power: 2000 watts Max.
- Cyclonic action spins dust & debris away from the filter so suction power remains strong
- 6 stage Filtration
- HEPA 12 filter for clean air
- Stainless steel telescopic tube
- Large floor head for maximum floor coverage
- One touch cord rewind function
- Removable and washable dust container parts
- 5m long power cable

Accessories: Service Nozzle, Furniture Brush, Telescope and Extension Tube

BARREL VACS

WV1400

1800W Wet & Dry Vacuum Cleaner with Blower

- Power: 1800 watts Max.
- 20L Tank capacity (11L wet & 16L Dry)
- 7L cloth bag for dry use
- Blower function to blow dust and debris
- Permanent filter for easy cleaning
- 180cm hose length
- Easy to clean, washable cloth bag
- Built-in covered storage for accessories
- Wheel base for easy maneuverability
- Wrapped around cord storage area
- 5m long power cable

Accessories: Service Tool, Floor (wet) Nozzle and Brush Accessory

BV2000

2000W Barrel Vacuum Cleaner

- Power: 2000 watts Max.
- 20L Tank capacity
- Blower function to blow dust and debris
- Permanent filter for easy cleaning
- 150cm hose length
- Easy to clean, washable cloth filter
- Metallic telescopic tube
- Wheel base for easy maneuverability
- On-Board storage for accessories
- Wrapped around cord storage area
- 5m long power cable

Accessories: Crevice tool, Floorhead and round brush

CORDLESS VAC

SVA420B

14.4 V 2-in-1 Cordless Stick Vacuum

- Power: 28.8 watts hour
- Lithium-ion battery and lightweight design for easy maneuverability around the home.
- Complete cleaning versatility - 2-in-1 floor and hand vacuum.
- Powered beater bar - designed to help lift stubborn debris from carpet and hard floor surfaces.
- Intelligent Boost mode allows the suction power to be increased for thorough debris pick-up.
- Wide mouth design for effortlessly scooping up large debris.
- Slim nozzle design on hand vacuum for greater accessibility and extra convenience.
- Easy to empty and washable bowl - For simple and hygienic maintenance.
- Translucent, bagless dirt bowl.
- Charging Base with accessory storage.

STEAM CLEAN IN MORE WAYS THAN ONE
THE NEW BLACK+DECKER™ steam-mop™ RANGE

- Cord Length: 5m
- Dust Bag capacity: 0.7L
- Twin Action Filtration System

Accessories: Crevice tool (long and short), SA Brush, SA Hose, Adaptor floor extension, Storage bag

12.5 W

TYPES OF VACUUM CLEANERS

Bagged vacuum cleaners

Bagged vacuum cleaners have a dust bag inside the main vacuum unit that collects the dirt as you vacuum. When the dust bag is full, it can either be disposed of or emptied and replaced depending on the type of bag you use.

Vacuum cleaners with bags generally require less maintenance than their bagless counterparts.

- More hygienic
- No indicators for bag; affects performance
- Less maintenance

Bagless vacuum cleaners

Bagless vacuum cleaners come with canisters that are easy to empty as compared to bagged vacuum cleaners. You only need to release the canister from the body of the vacuum cleaner and snap the lid of the canister. However, you need to empty the canister of the bagless vacuum cleaner with a little care to avoid chances of spreading allergies. The presence of HEPA filters in bagless vacuum cleaners also reduce the chances of spreading allergies.

- No need to change bags, which is a big expense
- Regular Filter cleaning, more maintenance
- Better performance
